PERFORMANCE

## Oledcomm's LiFiMAX products for Education

### ACCESS POINT

Allows access to the network, contains the intelligence of the LiFi system, including the LiFiMAXController®.

### PHOTONIC ANTENNA

A transmitter and signal repeater that allows optimal coverage of the space.

### LiFi TABLET

The world's first LiFi and WiFi enabled tablet.

### LiFi RECEIVER

To connect computers, tablets and smartphones in plug and play.

### LiFiMAXController®

An additional security layer that allows you to remotely manage all access points on your network, configure authentication and monitor logs.

## OLED COMM'S ACHIEVEMENTS

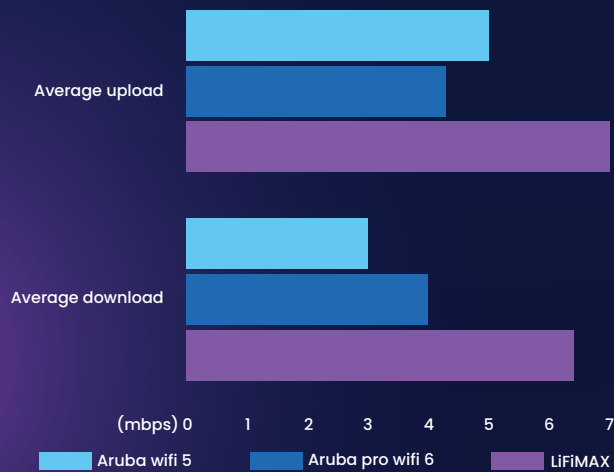

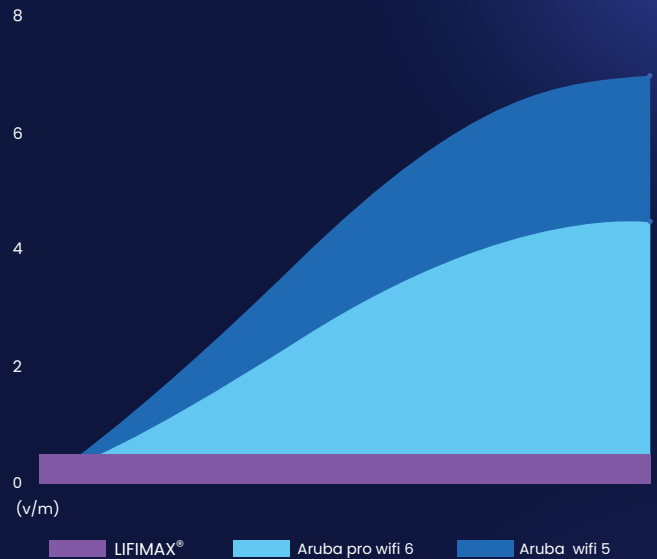

## More responsible connectivity

Our solutions reduce children's exposure to radiofrequency waves and meet the requirements of the Abeille law and the recommendations of the ANSES.

### Did you know?

The Abeille law imposes limits on exposure to electromagnetic waves in certain sensitive areas such as elementary school, childcare centers and nurseries. The law prohibits "wireless internet access (wifi) in areas dedicated to children's reception, rest and activities".

## Better connectivity

- Our solutions offer improved stability and reduced latency.
- The absence of radio interference avoids network saturation.
- Bandwidth is shared more equitably, thanks to Oledcomm's patented technology.

## Benefits of LiFiMAX in education

- Is compliant with Abeille law.
- Allows enhanced teaching with safety.
- Provides a reliable high-speed connection.
- Guarantees highest security standards.
- Enables dedicated connectivity spaces.
- Offers worldwide unique LiFi Tablet for learning.
